# OUR PROMISE

## Helping to Protect our Planet by creating and providing Sustainable Products and Solutions.

In 2004, Eco Guardian was founded with a simple yet powerful question: **How can we help reduce the number of single-use plastic bags?** This question, posed by our Founder & CEO, Anil Abrol, led to the creation of our first product line—reusable bags. Each bag we sold had the potential to replace thousands of plastic bags, and over the years, we witnessed a significant shift in the industry towards reusable options.

Building on this success, we embraced the belief that **“traditional thinking” can change**. If society can adopt more sustainable options for bags, why not for other products as well? Recognizing the immense waste generated by single-use food service items used daily worldwide, we sought better alternatives. This drive led us to develop a variety of sustainable products.

**Together, we can create a more sustainable world, one product at a time. We are committed to:**

### **Reducing Single-Use Plastics:**

By offering reusable and eco-friendly alternatives to everyday products.

### **Promoting Sustainable Practices:**

Encouraging individuals and businesses to adopt more sustainable habits.

### **Innovating for a Greener Future:**

Developing new products that help minimize environmental footprints.

### **Educating and Inspiring Change:**

Raising awareness about the importance of sustainability and the impact of our choices.

Consistent **quality**, the first time and **everytime**.

# WHO WE ARE

We're a Canadian Company that cares about the planet, and your business. We've built our manufacturing and supply chain strategically and sustainably to serve you better. Stocking over **150 environmentally friendly products** made from rapidly renewable resources offering superior strength and durability. We prioritize sustainability by **manufacturing our products close to our raw materials**, minimizing our environmental impact.

**Canada is moving toward a circular economy for plastics by pursuing zero plastic waste.** Our team continuously researches trends and new technologies to add more innovative, sustainable products and practices to our business—and yours.

Canadian Owned  
Operating in Canada  
for 20 Years

4 warehouses  
Mississauga, Montreal,  
Vancouver & Calgary

**89%**  
of our plastics are  
landfilled and  
incinerated

Single-use  
products account for  
**63%**  
of all plastics

## WHO DO WE SERVE?

### The Advantage of Being Our Partner

Flexibility, with the ability to contribute additional insight into your needs that sets you up for success

Working together to create the right sustainable package for you

Partnerships can only be built on trust, so we work hard to gain your trust for a strong relationship

### Providing eco-friendly food service and packaging products

Healthcare Facilities, Food Processing Industry, Restaurants and Foodservice, Regional and National Grocery Store Chains, Retailers Large & Small, National Wholesale Clubs, Regional and National Distributors

# QUALITY & INNOVATION

Eco Guardian is dedicated to providing solutions for your compostable needs. Unlike other companies that may offer an eco-friendly product line alongside traditional plastic and foam products, **compostable solutions are our core focus**. We've tested hundreds of traditional products and developed compostable solutions that meet or exceed the industry standards for strength, durability and sustainability.

Our deep understanding of the market allows us to continually innovate and remain agile. We offer **custom printing and embossing on our stock and non-stock items**. Branded food service products help to create and reinforce a stylish image which helps with positioning your brand in your customer's minds.

## Custom Printing & Products

Excellent brand proposition with customization abilities from custom product development to printing/ embossing.

## Tested Brand Comparisons

Tests reveal that Eco Guardian products perform equally well against its branded counterparts.

## Trusted Products & Suppliers

Complete line of household paper & single-use sustainable products for every food service program category, with applicable certifications – a true sustainability partner.

## Retail Products

Flexibility in retail pack quantities and design, private options available. All our products are retail ready.

## Ease of Ordering

Our teams operate in multiple countries and timezones. Send your order anytime day or night and we'll start processing it.
