

Canada's Main Objectives for Single-use Plastics

Canada's framework approach for single-use plastics:

1. Eliminate or significantly reduce single-use plastics entering Canada's environment
2. Reduce the environmental impact of plastic products overall
3. Conserve material resources by increasing the value recovery of plastics
4. Canada's goals in reducing landfill plastic waste:
 - to 490 kg per person by 2030 (a reduction of 30%); and
 - to 350 kg per person by 2040 (a reduction of 50%)
